*"A complicated stool with a simple construction,
without using glue or screws!"*

Separate wooden parts and approximately 110 meters of rope result in the design of the stool **Wrapped**. By simply wrapping the rope around, the construction is fixed, without using glue or screws. Every product will be assembled by the designer himself in his workshop in the Netherlands. The industrial handwork of Floris Hovers is being characterized by simple and clear industrial shapes and constructions.

***Wrapped** is a translation of the word **Ingewikkeld** in Dutch where it means both 'wrapped' and 'complicated' in one single word.*
